

Company Overview

Sensible Sensors for Sensitive Applications

Incorporated in 2007, driven by new opportunities in the 'Internet-of-Things' market, CartaSense offers end-to-end monitoring and alerting capabilities for cold-chain, agricultural and asset security applications.

We provide complete field proven systems using wireless sensors, gateways and cloud based computing that deliver real-time information to support real-time decision making for increased efficiency and profits.

Headquartered in Israel, the company maintains ecosystem partnerships with system integrators, value added resellers (VARs) and distribution channels around the globe.

Time to step-up – Join us and become our partner – help your customer gain peace of mind without compromising on fast ROI.

FREE your mind from worry

Be informed by REAL-TIME alerts

COMPLY with industry regulations

Gain PEACE of MIND and MAXIMIZE profits

Cold-Chain Quality Control

Complete pharma and perishables protection – from warehouse related damage through real-time monitoring of transportation, distribution centers and retail refrigerators.

Affordable sensors accompany shipments to provide full visibility and easy assessments of cold-chain quality.

Advanced Agricultural Monitoring

CartaSense sensors are cost-effective, easy to deploy and simple to manage.

Our comprehensive monitoring solution ranges from soil temperature and moisture levels through solar radiation (PPF) to storage humidity such as in silo-bags and greenhouses.

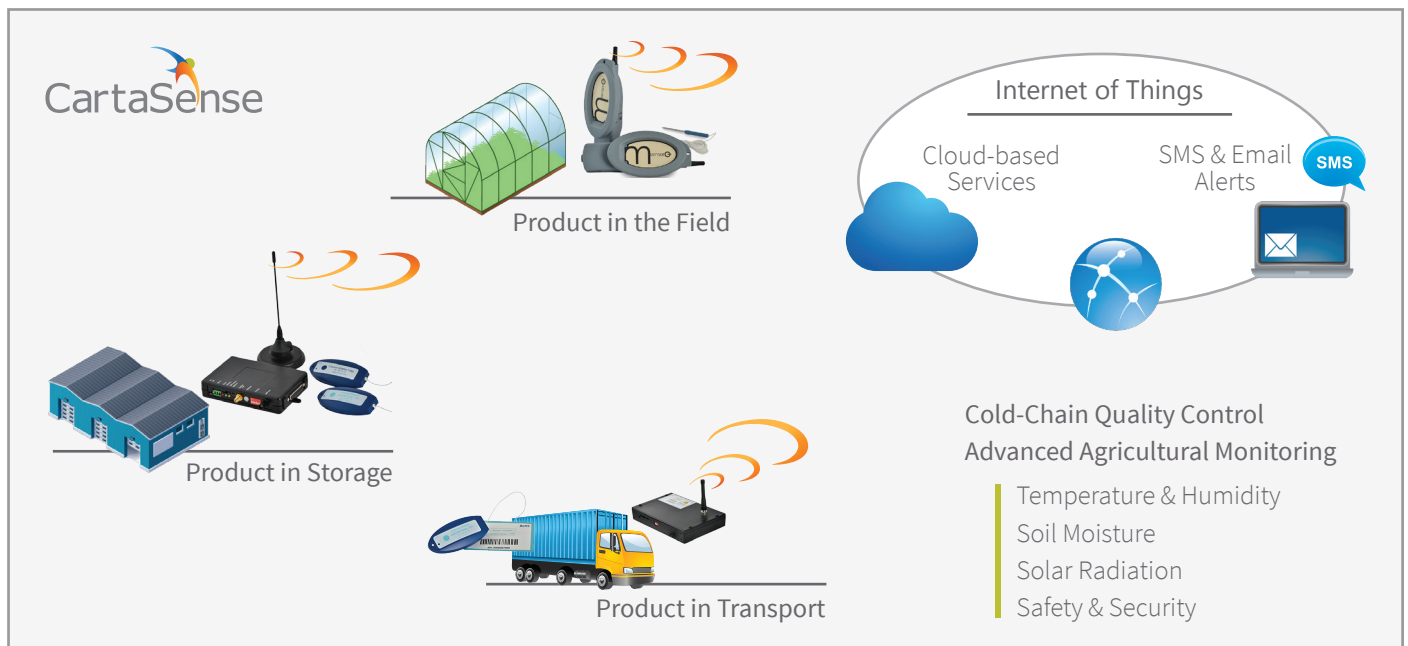

Internet of Things Approach

With 'always connected' sensors, CartaSense brings the Internet-of-Things to places where real-time is real-money.

Giving assets and pallets holistic visibility brings unprecedented value to traditional industrial and agricultural firms.

Always-on, Real-time Visibility

Time to Step-up

CartaSense finds innovative ways to bring value to its customers by providing real-time monitoring and tracking of their assets. Hundreds of thousands of our proven wireless sensors are already deployed in the field protecting grains, fresh produce, pharma and air freight. With a fresh perspective on perishable monitoring, CartaSense solutions enhance traditional industries, promoting improved operational efficiency, productivity and profitability.
